EDUCATION

KAIST September 2025 - June 2029
PhD Student in AI
Advised by Se-Young Yun

Yonsei University March 2019 - June 2025
Bachelor's Degree *2Y Leave of Mandatory National Service*
4.07/4.3 GPA

SPH International May 2018
International Baccalaureate Diploma
Mathematics, Physics, Economics, Business, English, Korean

SELECTED PUBLICATIONS (*EQUAL CONTRIBUTION)

[P2] Continually Post-training Small Models via Synthetic Self-distillation
Pre-print

W. Koh, H. Lee†, K. Lee†, H. Park†, D. Lee†, D. Hwang†, M. Lee†
† **LG AI Research, Superintelligence Lab**

[P1] Language Models Can Control Their Own Attention
Pre-print

N. Ho*, H. Amad*, W. Koh*, S. Yun, T. Schuster†, C. dos Santos†
† **Google DeepMind (Gemini)** **Highlighted by Elvis**

[C6] mSFT: Addressing Dataset Mixtures Overfitting Heterogeneously in Multi-task SFT
AACL 2026 Main

EXPERIENCE

Applied Scientist Intern (L5) September 2026 - December 2026
Amazon AGI Foundations (Bellevue)

- Hosted and mentored by Zhuowei Li, Hao Wang, Jakub Zablocki, Ritwick Chaudhry, Linghan Xu, Xuanbai Chen, Nishant Sankaran, Yifan Xing.
- Leading a research project on the topic of Co-evolution and MOPD.
- Internal position: Applied Scientist II

Research Scientist Intern May 2026 - August 2026
LG AI Research, Superintelligence Lab

- Hosted and mentored by Moontae Lee.
- [**P2**] Led a research project on continual post-training and self-distillation.

Research Intern (Member of Technical Staff) June 2025 - January 2026
Trillion Labs

- Hosted and mentored by Jay Shin, Juyoung Suk, and Sungjun Han.
- [**C5**] Led research on training a VLM generative mobile (e.g., Android) GUI world model for agents.
- [**C5**] Released `gWorld 8B` and `32B`, the first open-weight (pareto-frontier) visual mobile GUI world models featured in over 10 news outlets for outperforming models up to **50.25**× in size.
- [**C4**] Led research dramatically reducing (≥**100.2**×) scaling pre-training recipe search cost and improving dataset scaling prediction for Trillion Lab's next-generation large reasoning models.
- [**C4**] rBridge is featured in over 10 news outlets.
- Helping apply [**C4**] to evaluate pre-training data curation for Trillion Lab's biomedical MoE model.

Graduate Student 2025 -
KAIST AI

- [**C6**] Led multi-task data mixture post-training research consistently improving performance across **6** base models, **10** benchmarks, and saving FLOPs.
- [**C2**] Led inference-time scaling research to automatically scale high-quality user queries and feedback/evaluation mechanisms for chart (data visualization) code generation.
- [**C3**] Led reasoning post-training research (self-taught reasoners / rejection fine-tuning), reducing training FLOPs by **58.6%** while achieving best performance across **6/6** relevant benchmarks.

Visiting Researcher December 2023 - August 2025
KAIST AI (OSI Lab) Seoul, KR

- Hosted and mentored by Se-Young Yun, Taehyeon Kim, and Junghyun Lee.
- [**C1**] Led research on domain generalizing multi-agent reinforcement learning by proposing a training and inference algorithm.

Research Intern July 2023 - September 2023
KAIST AI (Humanoid Generalization Lab) Seoul, KR

- Hosted and mentored by Beomjoon Kim and Dongwon Son.
- Worked with LG Electronics on robust adversarial object pick-and-place project

Research Intern June 2022 - April 2023
KAIST DS (Financial Engineering Lab) Daejeon, KR

· Hosted by Woo Chang Kim.
